GCIP Pakistan's national and global winner selected for the Global Manufacturing and Industrialization Summit (GMIS)-Germany

National and global winner 2017 of GCIP Pakistan Mr. Nabeel Saddiqui from ModulusTech has been nominated by UNIDO to represent Pakistan at the Global Manufacturing and Industrialization Summit (GMIS). As a multi-stakeholder forum, GMIS aims to develop a roadmap to harness the Fourth Industrial Revolution for the benefit of less-industrialized regions and in response to the UN Agenda 2030.

A joint initiative launched by the United Nations Industrial Development Organization (UNIDO) and the Ministry of Economy of the United Arab Emirates, the [Global Manufacturing and Industrialization Summit \(GMIS\)](#) aims to promote a roadmap for future industrial development to echo the evolution in international trade and global best practices. GMIS is the world's first ever cross-industry forum, the Summit is designed to create universal consensus by unifying governments, businesses and civil society to take a transformational approach towards shaping the future of manufacturing.

In Pakistan, UNIDO is implementing "Global Cleantech Innovation Programme (GCIP)". The GCIP winner ModulusTech aims to revolutionize the affordable housing sector through its innovative flat-packed housing structure. Making it possible to set up houses in as little as 3 hours, these houses provide proper living conditions and come with integrated utilities and cost as low as \$3000. This Cleantech solution is a game-changer for the millions of displaced people around the world as well as in Pakistan, with over 20 million homeless people.

UNIDO aims to advance environmentally sustainable growth, build institutional capacities for greening industries through cleaner production technologies and resource efficiency methodologies, and create green industries, spurred by technology facilitation, innovation and partnership building.
