The COVID-19 Partners Platform supports global coordination and monitoring of country preparedness and response

The unprecedented nature of the COVID-19 crisis requires a coordinated global response...

- We are responding in solidarity – integrating and streamlining the planning, financing and monitoring of the global response, with transparency that has never been seen before
- The WHO developed the COVID-19 Partners Platform web-based tool to collaboratively scale-up preparedness and response to COVID-19
- This is the first time all countries are able to show the world what actions they are planning and implementing, request international support, and track contributions and progress in real-time

... The COVID-19 Partners Platform supports this coordinated response ...

- Facilitates planning aligned to international COVID-19 guidance developed in collaboration with countries and partners
- Supports the monitoring of preparedness and response activities at national and subnational levels
- Enables the costing of resource requests when they are not available at the country-level
- Provides visibility into the donor contributions that have been committed in the context of this outbreak

... And has already successfully engaged stakeholders across the globe

Countries are already using the platform

- 120+

Donor contributions have already been recorded, representing $2.4B

- 140+

Individuals have taken the COVID-19 Preparedness and Response training course

- >300K

Data As of 17 April 2020
